User Journey Map

Salim Medhat

- 30
- Sheikh Zayed
- IT Developer

scenario

Salim is a newly married who just moved to a new area. He's busy with work and doesn't know any local repairmen. When something breaks at home, he wastes hours searching online and still can't find someone reliable.

Expectations

- Find the craftsman as quickly as possible
- Secure payment process
- Contacting respected craftsmen

Stage	Awareness	Consideration	Comparison	Booking	Service (Execution)	Post-Service
Steps	• Sees ads / hears about the app / searches for home services	• Registers an account • Browses categories • Filters by location • Searches for craftsmen	• Compares craftsmen • Reads reviews • Views previous work/ photos	• Contacts craftsman via chat • Discusses details (price, time) • Confirms booking	• Waits for craftsman • Receives the service • Monitors the work	• Pays for the service • Rates & reviews • Decides to reuse the app
Thinking	• "I'll try this, maybe it's a solution." • "Can I trust this app?"	• "Why do they need this data?" • "There are too many categories..." • "I hope I find someone near me."	• "Is this provider good enough?" • "Are these reviews real?"	• "What's the final price?" • "Will they respond quickly?"	• "Will they arrive on time?" • "Will the quality be good?"	• "Was this worth it?" • "Will I use this again?"
Emotions						
Pain point	• Doesn't trust unknown providers • Doesn't understand the app value	• Complicated registration • Privacy concerns • Too many / unorganized categories • Difficulty finding relevant services	• Old or misleading images • Lack of trust in reviews • Too many options (decision fatigue)	• Slow response • Unclear pricing • Fear of wrong choice	• Late arrival / no-show • Poor quality work • Miscommunication • Price changes after agreement	• Unsecure payment concerns • No follow-up • Complaints ignored • Service issues after completion
opportunities	• Clear value proposition • Social proof (reviews, ratings, testimonials) • Strong branding & onboarding screens	• Simplify registration • Explain data usage clearly • Improve category structure (more general & intuitive) • Smart filters (location, rating, price)	• Verified reviews • Require updated portfolio images • Highlight "Top Rated" / "Recommended" • AI or smart recommendations	• Instant chat / quick replies • Transparent pricing estimates • Predefined service packages • Clear booking flow	• Real-time tracking • Notifications & reminders • Quality control / guarantees • Fixed pricing or approval before changes	• Secure payment system • Easy complaints & refund option • After-service follow-up • Loyalty offers / retention strategies

Karam Ahmed

- 27
- Old Cairo
- Founder & Artisan

Scenario

Karam is a young pottery maker who just started his own business. He creates beautiful handmade pieces but doesn't know how to market them online. He needs a simple way to reach customers who will appreciate his craft.

Expectations

- Finding a suitable craftsman as quickly as possible.
- Knowing the price of the service clearly in advance
- Having a reliable method for searching and selecting (reviews, portfolio)
- The possibility of direct communication with the craftsman

Stage	Discover	Preparation	Create Portfolio	Handle Requests	Complete Service	Payment	Get Rated
Steps	• Hears about the app from a friend or social media ad.	• Download the app. • Signs up using phone number (OTP)	• Adds profile picture • Lists services with prices • Uploads photos of previous work.	• The app is checked regularly • The agreement with the client is finalized if there is a request.	• Arrives on time • Performs the job • Confirms completion.	• Receives payment	• Gets rated by client
Thinking	• I'll try this, maybe it will be a solution.	• I hope it's easy	• Are my photos good enough? • Should I show my prices?	• Finally a request! I hope they're serious	• Hope the client is easy to deal with • Is this price fair?	• Did payment arrive?	• I hope for 5 stars.
Emotions							
Pain point	• Will this cost me money? Is the application easy or complicated?	• Account registration details are unclear • security	• No photography skills • Doesn't know what to write in bio	• Unqualified clients • Time wasted in negotiation • Difficulty managing multiple requests at once	• Scope changes • Miscommunication	• Is the payment guaranteed? • Delayed payment	• Lack of feedback clarity
opportunities	• Advertisements showcasing the benefits .	• Add examples of the required data format • Clarification of the privacy policy	• Guidelines for choosing the best image • Profile completion indicator	• Structured job requests • Client filtering • Smart filtering for relevant requests	• Simple in-app agreement • Chat history as proof	• Secure payment system • Escrow feature	• Fair review system • Performance insights
