Section 1

Craftmen

craftsmen 1

- Works locally or travels to other cities based on demand
- Project duration varies (day/week) depending on the issue
- Works for a company and takes private clients directly
- Clients re-hire him after seeing the quality of his work
- Fixed hourly rate pricing (No bargaining allowed)
- Prioritizes new clients to build a wider customer base
- Accepts modification requests after job completion
- Prefers working independently over working for contractors
- Posts work online regularly to attract new customers
- Customer ratings and reviews are highly important

craftsmen 2

- Works for a company with occasional side freelance jobs
- Uses a fixed hourly rate for pricing
- Modifies work if the client requests changes
- Attracts clients through the company's social media page
- Interested in using a dedicated app for work
- Strives for perfection and high-quality outcomes

craftsmen 3

- Willing to work outside his area for good pay
- Quotes higher prices initially to allow for bargaining
- Offers discounts to loyal clients
- Open to making modifications if requested by the client
- Frustrated when clients try to bargain down the price after the job is finished, despite a prior agreement

craftsmen 4

- Some customers refuse to pay an initial deposit.
- Each piece has a price based on the materials used, and the customer is informed of this.
- Some customers refuse to accept the order, and this causes a loss.
- I'm trying online marketing through Instagram.
- My clients are limited to my acquaintances and relatives only.

craftsmen 5

- Ratings are essential for promotion, most clients leave reviews.
- Focuses on product quality to ensure long-term durability.
- Requires full or partial payment upfront before starting the order.
- Prices are fixed with no bargaining (based on materials & effort)
- Fixed hourly rate pricing (No bargaining allowed)
- Work is seasonal; demand peaks in specific seasons, not year-round.
- Most orders are customized (size/details) per client request.
- Discusses all customization details via chat before execution.
- Uses Facebook as the primary platform for marketing and sales.
- Shipping is limited to the same governorate due to long-distance difficulties

craftsmen 6

- Demand depends on the season.
- Marketing is done through referrals from existing customers.
- Medium-grade materials are used to maintain an average price.
- Reliance on social media in marketing
- Customers leave reviews automatically
- I bear any losses or damages due to shipping.
- The marketing process is not carried out systematically.

craftsmen 7

- Some customers cancel the order upon delivery.
- The available materials and their prices are explained to the customer, and the customer is left free to choose.
- Marketing the business through a good website was effective, but the cost was high.
- Reliance on social media in marketing
- Any losses resulting from damage during shipping are the responsibility of the employer.
- Prioritize quality over price
- If the order is cancelled, you reduce its price and put it up for sale.

users

users 1

- Faces difficulty verifying service quality before hiring a technician.
- Previous work samples are important when choosing a technician.
- The search for a technician usually takes about one week.
- Technicians are not always consistent with appointment times.
- Has never used an app that connects customers with technicians.
- The most important feature in such an app would be real customer reviews.
- The service was not performed efficiently, and I had to fix the mistake again.

User 2

- Faces difficulty due to lack of clear pricing
- Price is the main factor when choosing a technician.
- Usually takes about two days to find a technician.
- Has never used an app to find technicians
- Prefers an app that shows photos of previous work.
- The lack of clarity regarding the service price is a major problem.
- Difficulty finding a technician nearby
- I can't trust any technician and let them into my home.

User 3

- Faces difficulty due to limited technician options in the area.
- Location proximity is the main factor when choosing a technician.
- Usually takes about one day to find a technician.
- Has never used an app to find technicians
- Prefers an app that allows filtering by price and location.
- I cannot determine if the price is appropriate for the service or not because I do not know the prices of the materials.
- I can't easily find a technician in my area.
